

Fruit fly is gone – thank you Auckland

With your support, the Queensland fruit fly is no longer residing in Auckland. That means there are no longer any restrictions on moving fruit and vegetables within Auckland.

Thank you for your patience and cooperation while we went about this important work. If this pest hadn't been contained and killed, it could have severely damaged our horticultural industry and home gardens.

We'll still be keeping a routine eye out for this pest using fruit fly traps. In the very unlikely event you find maggots in fruit, please contact our **Freephone 0800 80 99 66**.

Once again thank you for your support. We couldn't have done it without you.
