## ISSN 1177-2190

Cover image: Novel crop varieties, such as Purple Dawn kumara, that address consumer demands allow New Zealand horticultural products to command a premium in export markets.

## New Zealand horticulture - reaching new highs

This year, the value of New Zealand horticultural products has exceeded NZ\$8 billion for the first time, keeping the sector on track to meet Horticulture New Zealand's target of $\$ 10$ billion by 2020. This new record includes more than $\$ 5$ billion of exports, an increase of 52\% on 2010 figures. Horticulture contributed 10.3\% of New Zealand's merchandise exports for the year, another record high.

Efficient production systems, new cultivars, and strong branding and marketing all contribute to the industry's success. Whilst exports of kiwifruit, wine and apples dominate, New Zealand's crops are diversifying. Onion, pea, frozen potato and avocado exports are now each worth more than $\$ 80$ million. In addition, export value of blueberries have doubled and cherry exports have tripled since 2010.

The continued success of New Zealand's horticultural export industry has been founded on a keen understanding of market needs and the delivery of high quality produce that commands a premium in discerning markets. Across the value chain, every part of our industry strives to ensure New Zealand's brand and quality reputation are maintained, introducing new products and technologies to maintain this premium position.

Plant \& Food Research is proud to support the horticultural industry with research across the value chain, helping to capture new opportunities that add and sustain value for growers, producers, marketers and New Zealand.

Peter Landon-Lane
CEO, Plant \& Food Research

Source: ${ }^{\text {a Bollard (1996) }}$ "Statistics New Zealand *Estimate
$\rightarrow$ For the first time New Zealand's total horticultural produce exports in 2016 exceeded $\$ 5$ b fob value, being $19.4 \%$ and over $\$ 800 \mathrm{~m}$ above the 2015 export value, a remarkable increase recognising that New Zealand's horticultural produce exports were $\$ 3$ b in 2008 and only exceeded $\$ 4 b$ fob value in 2015.
$\rightarrow$ NZ horticultural exports are increasingly Asia focused, being 2.4 times more valuable than any other region at $\$ 1.932$ b in 2016 (2015:\$1.437b), compared with North America $\$ 814 \mathrm{~m}$ ( $\$ 649 \mathrm{~m}$ ), Australia $\$ 804 \mathrm{~m}$ ( $\$ 828 \mathrm{~m}$ ), Continental Europe \$741m (632m), UK/Ireland \$496m (\$467m).
$\rightarrow$ Fruit exports, including wine, increased $\$ 785 \mathrm{~m}(22 \%)$ to $\$ 4.3$ b; vegetable exports by $\$ 17 \mathrm{~m}(4 \%)$ to $\$ 615 \mathrm{~m}$; and flowers and seeds by $\$ 21 \mathrm{~m}(15.7 \%)$ to $\$ 155 \mathrm{~m}$.
$\rightarrow$ Exports of New Zealand wine increased in value by $\$ 150 \mathrm{~m}(11 \%)$ over 2015 values to exceed $\$ 1.5 \mathrm{~b}$ fob.

The origin of fruit and vegetable imports, 2016

The countries listed in this diagram send us more than $\$ 10 \mathrm{~m}$ (cif) of fruit and vegetables.
Many of these crops are not grown in New Zealand. Others complement availability gaps in New Zealand's own seasonal production. Products named when import value exceeds $\$ 5 \mathrm{~m}$.

Wine exports by country 2016 (\% by value)

$\rightarrow 90 \%$ of New Zealand produced wine was in four varieties: Sauvignon blanc $70 \%$, Pinot noir 8\%, Chardonnay 7\%, Pinot gris 6\%, although more than 17 other varieties were produced. Only $12 \%$ of New Zealand wine grapes were red vinifera.

Growth in wine exports and wineries 2005 to 2016

Sources: New Zealand Winegrowers Annual Report 2016
$\rightarrow$ The 436,000t of wine grapes crushed in 2016 was ahead of the average of $342,000 \mathrm{t}$ for the previous five years 2011-2015.
$\rightarrow$ Export volume in 2016 was 213 m litres (2015: 209m) with an average value of \$7.6/L (2015: \$6.8/L). Domestic consumption of New Zealand wine was estimated at 56 m litres ( 59 m litres average previous 5 years). 37.2 m litres of wine were imported in 2016 (77\% from Australia, Spain 8\%, France 5\%), the average for the previous five years being 34.1 m litres.
$\rightarrow$ The 36,200ha of wine grape production in New Zealand is spread across 11 regions, the largest being over 24,000ha in Marlborough and 4,700ha in Hawke's Bay, with five other regions having between $1,200 \mathrm{ha}$ and 2,000 ha each. The average vineyard area is 17.4 ha .
$\rightarrow$ Average yield of $12.0 \mathrm{t} /$ ha was well ahead of the average yield of $9.7 \mathrm{t} / \mathrm{ha}$ for the previous five years.
$\rightarrow$ Winery numbers at 675 in 2016 was almost the same as in 2010 (672), but 28 fewer than 2012.

## Wine Grenade

The Wine Grenade is a simple, easy-to-use oxygenation device, developed in New Zealand, which is manually activated and lowered into a wine tank. Product trials have shown the Wine Grenade to be highly effective in mimicking oak barrel maturation. This, along with a significant reduction in cost and complexity, make it an attractive oxygenation option for small-to-medium sized winemakers. Wine Grenade is set to make a major contribution to the wine industry by providing consistent quality and exciting new styles with reduced production costs.

New Zealand kiwifruit export markets (year to 30 June 2016)

$\rightarrow$ The value of New Zealand kiwifruit exports in 2016, at \$1.672b fob, was 42\% above 2015 and $65 \%$ above the average value of $\$ 1.011$ b for the previous five years.
$\rightarrow \quad \ln 2015$, New Zealand produced kiwifruit were exported to more than 50 countries and of the $\$ 1.089 \mathrm{~b}$ that went to Asian countries, three Asian countries imported more than \$100m: Japan \$390m (2015: \$275m); China \$373m (\$200m), Taiwan \$154m (\$101m). Kiwifruit to the value of $\$ 435 \mathrm{~m}$ ( $\$ 352 \mathrm{~m}$ ) went to European countries, of which $\$ 108 \mathrm{~m}$ was shipped to Spain (\$88m).
$\rightarrow$ The impact of the bacterial canker disease specific to kiwifruit, Pseudomonas syringae pv. actinidiae (Psa) on kiwifruit production in 2014 is illustrated in the production graph on page 11. Zespri's 2016 Annual Review has this update: "Across the industry, New Zealand kiwifruit growers have responded to the challenge of growing in a Psa environment by improving orchard management practices. Combined with favourable weather conditions last season, the result was a very large crop."
$\rightarrow$ 'Zesy002', the gold-fleshed kiwifruit marketed as Zespri® SunGold Kiwifruit, has supported the industry's rebound, with Zespri demonstrating it's confidence by increasing crop area by 400 ha and stating "SunGold is still a relatively new product with overwhelmingly positive customer and consumer feedback from the market."
$\rightarrow$ The average orchard gate return per hectare increased to more than $\$ 60,750$ (2015: \$57,370).
$\rightarrow$ In addition to exports from New Zealand of 407,940t* (2015: 487,630t*), under its Global Supply initiative, Zespri procured a further 52,200t (2015: 47,500t) from contracted producers in Italy, France, Korea, Japan, and Australia to maintain year-round availability of its brand.

$\rightarrow$ In 2015 \& 2016 the 'World Apple Review' ranked New Zealand \#1 amongst 33 major apple- producing countries after measuring 23 criteria covering production efficiency, industry infrastructure and financial and market factors. The review cited New Zealand's average yield for apples from 2013 to 2015 was 60.7t/ha compared with 32 other apple-producing countries average of $25.4 \mathrm{t} / \mathrm{ha}$.
$\rightarrow$ The World Apple Review tracked 45 different apple varieties and concluded " ...New Zealand has for decades sought to produce apple varieties that can obtain a premium in international markets... With the exception of a small and declining share of 'Granny Smith' apples, New Zealand has no remaining plantings of the traditional majors... 'Gala', 'Braeburn' and 'Fuji' represent past waves of innovation..."
$\rightarrow$ Pipfruit New Zealand advises the New Zealand industry has " ...developed a mix of proprietary New Zealand varieties that appeal to the new apple consumers particularly in the developing Middle Eastern and Asian markets (that)... have grown from 10 to 50 per cent... " of New Zealand's apple exports.

Apple export production by variety: 2010-2016

## New apple dazzles

'PremA129', which is marketed as Dazzlee. is a new large, red, sweet apple currently being commercialised by Fruitcraft under license from Prevar". Dazzle is a cross of Sweetie and 'Scired', and its sweet qualities appeal to the growing Asian markets. More than 300,000 trees are already being grown by growers and nurseries in New Zealand.
$\rightarrow$ Pipfruit New Zealand also report "...A million more new apple trees are being planted across the country as international demand for New Zealand apples continues... resulting in significant economic and social benefits in the growing regions of Nelson, Hawke's Bay, Central Otago, Gisborne, Waikato, Wairarapa and South Canterbury" with " ...millions of dollars injected back into the local economies".

Fruits used for processing is produced on the orchard areas described in the fresh fruit table. ${ }^{\text {a Sector estimates of first }}$ point of sale values, "Statistics New Zealand, Overseas Trade Statistics 'Author's estimate. Blank entries indicate either that the information is not available or items are valued at less than $\$ 100,000$.
$\rightarrow$ A standout summerfruit crop was cherries increasing from 1,622t in 2006 to 5,284t in 2016, and export value increasing from $\$ 9.0 \mathrm{~m}$ in 2006 to $\$ 68.0 \mathrm{~m}$ in 2016.
$\rightarrow$ A New Zealand success in high value fruit exports is blueberries (fresh/chilled/ frozen) with 2016 exports of $1,900 t$ and an export value of $\$ 41 \mathrm{~m}$. This compares with 2016 blueberry imports of $2,400 \mathrm{t}$ and a cif value of $\$ 13 \mathrm{~m}$. Fruit imports are primarily crops not grown in NZ or are required to complement availability gaps.

Expanding export markets for New Zealand avocados requires meeting strict phytosanitary and quality standards. Plant \& Food Research designed and developed a three-nozzle high pressure washing (HPW) system which very effectively cleaned fruit, achieving 100\% removal of some surface pests and approximately $98 \%$ of pests of quarantine concern. Compac ${ }^{\oplus}$ Sorting Equipment Limited now manufacture and market a rotary HPW system incorporating this knowledge and system and the New Zealand avocado industry has voluntarily adopted the use of HPW treatments for all exported fruit.

Vegetable exports 2005-2016 (\$ million, fob)

Source: Statistics New Zealand
$\rightarrow$ Total value of vegetable exports in 2016, at $\$ 615 \mathrm{~m}$, was $\$ 24 \mathrm{~m}$ above 2015 with the largest increase in value being onion exports increasing from $\$ 81.4 \mathrm{~m} / 174,000 \mathrm{t}$ in 2015 to $\$ 112.5 \mathrm{~m} / 181,500$ t in 2016.
$\rightarrow$ In 2016, three vegetable export crops, fresh/frozen/dried or as vegetable preparations, were close to $60 \%$ of the value of all vegetable exports: peas $\$ 84.3 \mathrm{~m}$, potatoes $\$ 83.6 \mathrm{~m}$ and sweetcorn $\$ 41.8 \mathrm{~m}$. Other frozen vegetables, mixed or singular, were a further $\$ 54.3 \mathrm{~m}(15 \%)$, other vegetables both dried or other processes $\$ 68.1 \mathrm{~m}$ $(19 \%)$ with juiced vegetables, predominantly carrots, $\$ 23.8 \mathrm{~m}(7 \%)$.
$\rightarrow$ Total volume of vegetable exports from New Zealand in 2016 was 506,200t and almost the same as in 2015 .
$\rightarrow$ Fresh and processed vegetables were exported to 91 countries in 2016 (2015: 76), with more than half ( $56 \%$ ) to two countries:

- $32.6 \%$ to Australia: $\$ 200.2 \mathrm{~m}$ (fresh veg. $\$ 10.1 \mathrm{~m}$, frozen $\$ 126.6 \mathrm{~m}$ [potatoes $\$ 52.2 \mathrm{~m}$, mixed veg. $\$ 24.2 \mathrm{~m}$, peas $\$ 29.1 \mathrm{~m}$ ], vegetable preparations $\$ 59.3 \mathrm{~m}$ [of beans: $\$ 31.0 \mathrm{~m}$ ].
- $23.4 \%$ to Japan: $\$ 143.6 \mathrm{~m}$ (fresh $\$ 85.7 \mathrm{~m}$ [squash $\$ 44.9 \mathrm{~m}$, capsicums $\$ 20.6 \mathrm{~m}$ ]), frozen $\$ 24.5 \mathrm{~m}$, vegetable juice $\$ 18.9 \mathrm{~m}$ (predominantly carrot).
$\rightarrow$ New Zealand imported 103,500 t of vegetables in 2015 with a cif value of $\$ 212.3 \mathrm{~m}$ (2014: 96,100t/\$196.9m cif).
$\rightarrow$ New Zealand imported 107,240t of vegetables with a cif value of $\$ 243.8 \mathrm{~m}$ (2015: $103,500 \mathrm{t} / \$ 212.3 \mathrm{~m}$ cif) from 74 countries in 2016. Largest volume vegetable imports were 26,500 t of preserved tomatoes (Italy 11,800t, the USA 11,300t), 17,000t of frozen potatoes (Continental Europe 7,000t [The Netherlands and Belgium], Australia 6,900t).

Destinations of New Zealand vegetable exports 2016 (\$ million, fob)

Ensuring operational efficiency at the Heinz Wattie's facility in Hawke's Bay means matching the required volume and size of crops coming in for processing to the capabilities and needs of the factory at that particular time. Crop scheduling tools and management models have been developed to help beetroot growers and managers with their decision-making by predicting yield, size, and timing of the crop to ensure the right volume of beetroot at the right time is delivered to the processing facility, and with the right specifications.

## Organic production

$\rightarrow$ New Zealand horticultural land area under organic certification increased by $128 \%$ in the three years from $2012(11,188 h a)$ to 2015 (25,476ha), reflecting significant growth principally in certified organic pipfruit and vineyard production.
$\rightarrow \ln 2015$ there were 610 organic operations in horticulture, down 5\% from 2012.
$\rightarrow$ Export values of organically certified fresh fruit and vegetables in 2015 were calculated to be $\$ 108 \mathrm{~m}$ and $45 \%$ of total organic sector produce exports.
$\rightarrow \quad \ln 2015$, the New Zealand market for organic food, including that both exported and domestically consumed, was estimated at between $\$ 457 \mathrm{~m}$ and $\$ 467 \mathrm{~m}$. This compares with an estimated $\$ 350 \mathrm{~m}$ in 2012 - a $30 \%$ increase.

The term "bulbs" is used to include bulbs, corms, tubers, tuberous roots, crowns \& rhizomes. *Authors' estimate. Source: Statistics New Zealand.
$\rightarrow$ In the past decade exports of cut flowers and foliage decreased in value from $\$ 39.2 \mathrm{~m}$ in 2006 to $\$ 27.0 \mathrm{~m}$ in 2016. Seeds, however, increased from $\$ 41.8 \mathrm{~m}$ to $\$ 78.3 \mathrm{~m}$ (vegetable seeds $\$ 38.6 \mathrm{~m}$ to $\$ 74.2 \mathrm{~m}$ ) and other bulbs, tubers, corms, live plants and moss from $\$ 45.5 \mathrm{~m}$ to $\$ 49.8 \mathrm{~m}$. 2016 imports in these categories (cif value) were cuts flowers and foliage $\$ 4.6 \mathrm{~m}$, seeds $\$ 26.2 \mathrm{~m}$ (veg. seed $\$ 22.7 \mathrm{~m}$ ), and bulbs and other live plants $\$ 9.7 \mathrm{~m}$.

Exports of flowers, seeds and bulbs (\$ million, fob)

Source: Statistics New Zealand
$\rightarrow$ Of the $\$ 27.0 m$ of cut flowers exported to 38 countries in 2016, Asia was the largest destination region, at $\$ 15.7 \mathrm{~m}(2015$ : $\$ 12.5 \mathrm{~m})$, dominated by Japan, at $\$ 11.9 \mathrm{~m}$ (orchids $\$ 8.1 \mathrm{~m})$. The next largest destination market was the USA, at $\$ 4.6 \mathrm{~m}$, exports to all other countries each being less than $\$ 2.0 \mathrm{~m}$ fob value.
$\rightarrow$ Vegetable seed valued at $\$ 74.3 \mathrm{~m}$ in 2016 (2015: $\$ 62.2 \mathrm{~m}$ ) was exported to 63 countries (2015: 46 countries), having been only $\$ 15.9 \mathrm{~m}$ in 2000 although a record $\$ 80.3 \mathrm{~m}$ in 2013. Largest export value destinations were: Continental Europe $\$ 42.8 \mathrm{~m}$ (The Netherlands $\$ 25.4 \mathrm{~m}$, Germany $\$ 5.6 \mathrm{~m}$ ), Asia $\$ 24.0 \mathrm{~m}$ (Korea $\$ 8.5 \mathrm{~m}$, Japan $\$ 5.3 \mathrm{~m}$, Viet Nam \$3.2m) and the USA $\$ 3.3 \mathrm{~m}$. Exports to the 57 other countries were each less than $\$ 3.0 \mathrm{~m}$ fob.

New Zealand honey production 2016 (19,885 tonnes)

Source: AsureQuality Ltd

## A vital contributor to horticulture

$\rightarrow$ Bees are crucial to New Zealand's primary sector, pollinating approximately onethird of our food sources and playing a significant role in determining crop yields.
$\rightarrow$ Honey production in 2016, at 19,885t (2015: 19,710t), was 4,891t and $33 \%$ above the previous five year average of 14,994 t.
$\rightarrow$ In 2016 New Zealand's honey exports went to 50 countries valued at $\$ 314.5 \mathrm{~m}$ fob (2015: $\$ 233.1 \mathrm{~m}$ ). Retail packs were $86 \%$ by weight. Exports to seven countries exceeded $\$ 20 \mathrm{~m}$ fob value: Australia $\$ 56.9 \mathrm{~m}(2015: \$ 33.1 \mathrm{~m})$, China $\$ 52.7 \mathrm{~m}(\$ 36.7 \mathrm{~m})$, Hong Kong $\$ 39.5 \mathrm{~m}(\$ 28.0 \mathrm{~m})$, the UK $\$ 38.7 \mathrm{~m}(2015 \$ 45.2 \mathrm{~m})$, Japan $\$ 31.5 \mathrm{~m}$ ( $\$ 17.5 \mathrm{~m}$ ), the USA $\$ 27.9 \mathrm{~m}(\$ 18.0 \mathrm{~m})$, Singapore $\$ 22.1 \mathrm{~m}(\$ 15.8 \mathrm{~m})$. In 2015 honey exports to only four countries exceeded $\$ 20 \mathrm{~m}$ each.
$\rightarrow$ As at June 2016 New Zealand's 6,735 registered beekeepers (2015: 5,551) had 684,046 hives, an increase of 108,174 ( $19 \%$ on 2015). In 2010, New Zealand had 376,673 hives and produced 12,553 tonnes. Export of natural honey in 2010 was valued at $\$ 97.6 \mathrm{~m}$ fob.

People in horticultural training, per year 2001-2016

Source: Primary ITO
$\rightarrow$ In 2016 the total number of trainees in the different fields of horticulture was 5,894 compared with 5,716 in 2015 and 7,449 in the exceptional 2014 year.
$\rightarrow$ Trainee numbers in the subjects of fruit, vegetables and viticulture (wine grape) production, plus the small number in organics (7 in 2016) totalled 3,546 in 2016 which was a new record; 2015: 3,340; 2014: 3,269. The average number of trainees in produce production subjects for the five years from 2011 to 2015 was 2,203 per year.

New Zealand consumer spending on vegetables (\$ million) llocal \& imported produce, fresh / chilled / dried / canned / bottled / frozen

New Zealand consumer spending on fruit (\$ million)
Calculated aggregate annual expenditure by all private New Zealand households (local \& imported produce, fresh / chilled / dried / canned / bottled / frozen)

Source: Statistics New Zealand: triennial Household Economic Survey (HES), 2016

In 2016 New Zealand
$\rightarrow \$ 800 \mathrm{~m}$ on fresh and chilled fruit
$\rightarrow \$ 160 \mathrm{~m}$ on processed fruit
$\rightarrow \$ 930 \mathrm{~m}$ on fresh and chilled vegetables
$\rightarrow \$ 330 \mathrm{~m}$ on processed vegetables
$\rightarrow \$ 820 \mathrm{~m}$ on wine

Source: Statistics New Zealand: triennial Household Economic Survey (HES), 2016. N.B. survey is of households only and excludes overseas visitors, people living in hotels and motels, etc., and excludes restaurants and takeout meals.

Investment in the horticultural industries, 2016

|  | Crop area (ha) | On-farm (\$ million) | Off-farm (\$ million) | Total <br> (\$ million) |
| :---: | :---: | :---: | :---: | :---: |
| Apples, pears \& nashi | 9,825 | 1,277 | 878 |  |
| Wine grapes | 36,700 | 6,813 | 17,033 |  |
| Kiwifruit | 12,260 | 5,027 | 3,456 |  |
| Summerfruit | 2,080 | 166 | 114 |  |
| Avocados | 3,950 | 383 | 211 |  |
| Citrus | 1,740 | 139 | 77 |  |
| Berryfruit | 3,055 | 244 | 168 |  |
| Nuts | 1,340 | 107 | 29 |  |
| Olives | 2,280 | 182 | 125 |  |
| Other subtropical fruit | 700 | 56 | 23 |  |
| Hops | 415 | 33 | 82 |  |
| Other fruit | 860 | 69 | 28 |  |
| Total fruit | 75,205 | \$14,498 | \$22,226 | \$36,724 |
| Potatoes | 10,330 | 620 | 298 |  |
| Peas \& Beans | 9,750 | 634 | 305 |  |
| Onions | 5,140 | 308 | 148 |  |
| Squash | 6,525 | 457 | 220 |  |
| Sweetcorn | 4,900 | 294 | 141 |  |
| Broccoli, cabbages \& cauliflowers | 3,640 | 218 | 105 |  |
| Carrots | 1,880 | 113 | 54 |  |
| Asparagus | 850 | 51 | 25 |  |
| Lettuce | 1,485 | 89 | 49 |  |
| Other vegetables | 6,000 | 360 | 149 |  |
| Total vegetables (outdoor) | 50,500 | \$3,144 | \$1,494 | \$4,638 |
| Floriculture - outdoor | 590 | 35 | 18 |  |
| Protected - high tech | 85 | 340 | 102 |  |
| - greenhouse tomatoes | 120 | 360 | 108 |  |
| - low/medium tech. | 320 | 480 | 144 |  |
| - floriculture (undercover) | 340 | 510 | 51 |  |
| Total floriculture \& protected crops | 1,455 | 1,725 | 423 | \$2,148 |
| Total horticultural | 127,160 | \$19,367 | \$24,143 | \$43,510 |

The above table is an estimate of the investment that has been made in the productive area of New Zealand horticulture and related postharvest facilities.
Crop area figures are predominantly industry estimates of planted areas per crop for the year to June 2016 (pgs 8 to 16 incl.) with author adjustments for informal production and differ from StatsNZ Agricultural Production Census hectares as at June 2012 (pgs 26 \& 27). Total hectares in horticulture are estimated to have increased by $4.5 \%$ on the census 2012 total.
Land values are based on independent land valuation advice and industry and authors' estimates.
No adjustment has been made for non productive farm/orchard/vineyard areas that are typically $15 \%$ of total area and up to $80 \%$ for crops such as floriculture under cover.
Off-farm investment levels have been estimated from industry advice and guidance including integrated producers whose supply chain includes both production and post production.
$\rightarrow$ Total investment in New Zealand's horticultural industry is estimated to be in excess of \$43b inclusive of off-farm postharvest facilities for cleaning, sorting, packaging, storing and processing produce from an estimated 127,160ha of cultivated horticultural crops in fruit, vegetables and flowers.
$\rightarrow$ New Zealand's largest investments in horticulture by crop type are in viticulture, kiwifruit, pipfruit and potatoes. Collectively these four are estimated to be $54 \%$ of horticulture land in production and $81 \%$ of the total on-farm and off-farm investment in New Zealand horticulture.

## New Zealand APPLES

it takes more than fresh air \&
sunshine to grow the world's best...

## About the Trust

The New Zealand Horticentre Trust was established in 2008 with the objective of providing 'A helping hand for horticulture.'
The Trust encourages Horticulture and Viticulture sector groups to apply for grants to assist them in the promotion of education, training \& research in New Zealand.

The NZ Horticentre Trust has three principal sponsors, Horticentre, TasmanCrop and HortFertplus. These three principal sponsors have been providing quality products and services to commercial crop growers since the 1980's. The NZ Horticentre Trust is proud to be supporting the Horticulture, Viticulture and Nursery sectors in NZ.

- Food Safety and Traceability Committee
- Fruit in Schools Management
- Health and Nutrient Claims
- Nutrition Information Panels
- Biosecurity
- Communications and Public Relations
- International Connections
- Research Projects and Pilots
- Supporting the 5+ A Day Charitable Trust to raise awareness and consumption
