## New Zealand exports exceed $\$ 6.6$ billion

In 2020, the New Zealand horticultural industry reached a new high, with total produce estimated to exceed $\$ 10$ billion for the first time. Horticultural exports increased by 7\%, earning more than $\$ 6.6$ billion, more than 11\% of New Zealand's merchandise exports.

Fresh fruit export earnings have increased by 8\% to \$3.7 billion, with key categories - including kiwifruit (10\% on 2019), apples ( $6 \%$ ) and avocado ( $8 \%$ ) - demonstrating strong growth. New Zealand wine export earnings have also grown to $\$ 1.9$ billion, a $6 \%$ increase. Whilst export earnings from fresh vegetables have remained static at $\$ 300$ million, processed vegetables have also increased by $7 \%$ to $\$ 424$ million. Vegetable seed export earnings have increased by 95\% over the past decade to $\$ 112$ million, predominantly due to increased demand for carrot and radish seed.

In a year affected by the COVID-19 pandemic, New Zealand's horticulture industry has demonstrated resilience and our produce is more in demand than ever. Our reputation for high quality and safe food, combined with excellent growing systems and novel products, is vital in maintaining New Zealand's share of the global marketplace.

Plant \& Food Research is proud to be able to support the New Zealand horticulture industry in continuing to excel, providing the science that helps the industry maintain its global reputation as an innovative and environmentally-conscious provider of excellent food. We are committed to working together with the horticulture industry to create a smart green future for Aotearoa New Zealand.

David Hughes
CEO, Plant \& Food Research

Source: Statistics New Zealand *Estimate
$\rightarrow$ New Zealand horticultural produce exports in 2020 were a record $\$ 6.65$ billion fob value and $\$ 450$ million more than the $\$ 6.2 \mathrm{~b}$ fob value in 2019 - which was also a record. The average value for the five years prior, 2014 to 2018, was $\$ 4.8 \mathrm{~b}$ fob.
$\rightarrow$ Compared with 2019, the largest value increases were kiwifruit +\$231m, grape wine $+\$ 102 m$, apples $+\$ 47 m$ and vegetable seeds $+\$ 25 m$.
$\rightarrow$ In 2020, ten product categories were $92 \%$ by value of total New Zealand horticultural produce exports (fresh, frozen and other processes): kiwifruit \$2,540m (2019: $\$ 2,302 \mathrm{~m}$ ), grape wine $\$ 1,908 \mathrm{~m}(\$ 1,807 \mathrm{~m})$, apples $\$ 898 \mathrm{~m}$ ( $\$ 853 \mathrm{~m}$ ), onions $\$ 148 \mathrm{~m}$ ( $\$ 170 \mathrm{~m}$ ), potatoes $\$ 126 \mathrm{~m}(\$ 129 \mathrm{~m})$, avocados $\$ 122 \mathrm{~m}(\$ 110 \mathrm{~m})$, peas $\$ 115 \mathrm{~m}(\$ 96 \mathrm{~m})$, vegetable seeds $\$ 112 \mathrm{~m}(\$ 87 \mathrm{~m})$, squash $\$ 79 \mathrm{~m}(\$ 60 \mathrm{~m})$, and cherries $\$ 51 \mathrm{~m}(\$ 69 \mathrm{~m})$.

Horticultural exports 2020 (\$ million, fob)

$\rightarrow \quad \ln 2020$ five markets, each exceeding $\$ 500 \mathrm{~m}$ fob value, accounted for $68 \%$ of New Zealand's total horticultural exports (2019: 68\%): to Continental Europe $\$ 1,099 \mathrm{~m}$ (2019: \$998m), Japan $\$ 917 \mathrm{~m}$ ( $\$ 790 \mathrm{~m}$ ), the USA $\$ 864 \mathrm{~m}$ ( $\$ 786 \mathrm{~m}$ ), Australia $\$ 836 \mathrm{~m}$ (\$818m), and China \$784m (\$753m).
$\rightarrow$ Whilst kiwifruit, grape wine, apples, onions, and potatoes were the dominant export crops by values, the export value of some lesser recognised crops have increased markedly in the past ten years:

- Avocados, fresh and as avocado oil: 2020 export value $\$ 122 m$ (2010: $\$ 62 m$ )
- Peas, frozen and dried, 2020: \$115m (\$72m)
- Vegetable seeds, 2020: \$112m (\$57m)
- Cherries, fresh/chilled, 2020: \$51m (\$23m)
- Hops, as cones and extracts, 2020: \$40m (\$6m).
- Vegetable juices, dominated by carrot juice, 2020: \$34m (\$19m)
- Beetroot, processed, 2020: \$24m (<\$2m)

Horticultural exports - Years to June (\$ billion, fob)

Source: Statistics New Zealand

Produce from New Zealand's
horticultural industries is
calculated to exceed \$10 billion.

New Zealand horticultural exports are assisted by a strong domestic market base.

Source: Statistics New Zealand merchandise exports, with domestic market figures derived from the triennial Household Economic Survey (HES) 2019 and Statistics New Zealand estimate of mean number of private dwellings year to 30 June 2020.

## Horticulture helps to build New Zealand's profile in many overseas markets.

Export destinations for New Zealand horticultural products

- trends since 2010 (\$ million, fob)
$\rightarrow$ New Zealand-grown fruits, vegetables and flowers were exported to 128 countries in 2020, compared with 117 countries in 2010 .
$\rightarrow$ Exports to 31 countries exceeded $\$ 10 \mathrm{~m}$ (fob) in 2020, up from 25 countries in 2010.
$\rightarrow$ New Zealand also earned over \$122m from horticultural machinery and components exports (2010: \$52m), as well as additional income from royalties and licence agreements.

## Trends

$\rightarrow$ In 2020 New Zealand fruit and vegetable exports to five markets exceeded $\$ 500 \mathrm{~m}$ fob value: Continental Europe ( $\$ 1,099 \mathrm{~m}$ ), Japan ( $\$ 917 \mathrm{~m}$ ), the USA ( $\$ 864 \mathrm{~m}$ ), Australia ( $\$ 836 \mathrm{~m}$ ) and China ( $\$ 784 \mathrm{~m}$ ). These five export markets accounted for $\$ 4.5$ b and more than two thirds ( $68 \%$ ) of New Zealand's total horticultural exports in 2020.
$\rightarrow$ Exports to six other destinations exceeded $\$ 100 \mathrm{~m}$ : the UK $\$ 536 \mathrm{~m}$, Taiwan $\$ 266 \mathrm{~m}$, Canada $\$ 179 \mathrm{~m}$, Korea $\$ 166 \mathrm{~m}$, Vietnam $\$ 128 \mathrm{~m}$ and Hong Kong $\$ 115 \mathrm{~m}$. Horticultural exports to Asian countries in 2020 were $\$ 2.8 \mathrm{~b}$ ( $42 \%$ of total NZ horticultural exports).
$\rightarrow$ The diversity of horticultural products exported is apparent in the 25 products exported to Asia each between $\$ 5 \mathrm{~m}$ and over $\$ 1.5 \mathrm{~b}$, and to Australia with 16 categories between $\$ 5 \mathrm{~m}$ and over $\$ 361 \mathrm{~m}$ fob value.

$N D=$ no data. Varieties aggregated as 'other red' or 'other white' all had production < 500 tonnes in 2020
Wine exports by country 2020 (\% by value)

$\rightarrow$ In 2020 wine exports from New Zealand were valued at $\$ 1.91$ b an increase of $84 \%$ from 2010 (\$1.03b fob). In the same decade, planted area increased by $19.5 \%$ from 33,428 ha to 39,935 ha and production increased by $71.8 \%$ from 266,000 tonnes to 457,000 tonnes.

## Everything is connected

Examining how vineyard management choices can enhance biodiversity and improve grapevine performance is the focus of the Vineyard Ecosystems programme.
Established in 2015 by New Zealand Winegrowers and the Partnership Fund at MBIE, the seven-year programme involves wide-ranging sampling and analysis across 24 individual vineyards in Marlborough and Hawke's Bay. Statistical modelling is then used to verify trends and indicate cause-and-effect relationships.
Reducing synthetic agrichemical use is an important goal, and the wine industry is already adopting new guidance on how to reduce herbicide applications, provide alternative habitats for pest control, and protect pruning wounds against grapevine trunk disease.
$\rightarrow 200$ years ago the first grape vines in New Zealand were at Kerikeri in the Bay of Islands. In 2020 commercial wine crops were grown across 11 regions with the main varieties being sauvignon blanc $71 \%$ (2010: 66\%), pinot noir 8\% (9\%), pinot gris $6 \%(5 \%)$ and chardonnay $6 \%$ (10\%). Collectively these four varieties were $91 \%$ (2010: 89\%) of New Zealand's grape wine production tonnage.
$\rightarrow$ Opened in 2020, New Zealand's Bragato Research Institute's (BRI) Research Winery is a new research facility to trial world-first technologies, conduct commercial trials, and connect educators and students to science and industry. A study conducted for BRI calculated that wine research and development lead to annual increases of more than $\$ 40 \mathrm{~m}$ in exports, $\$ 64 \mathrm{~m}$ in GDP and 250 new jobs.
$\rightarrow$ Features of New Zealand's wine sector include over 96\% of New Zealand's vineyard area certified as achieving 'Sustainable Winegrowing' standards, increases in organic winegrowing with now 111 certified organic grape growers and 73 certified organic wineries, and wine tourism with 262 wineries offering 494 wine tourism experiences.

Growth in wine exports (volume (litres) and value millions of NZ\$ fob) 2010 to 2020 compared with relative change in production area and number of growers (relative change scaled to 2010 datum point)

## Scientists are cracking the code to kiwifruit pollination success

Plant \& Food Research scientists and collaborators from the USA have compiled more than 30 years of field-based data from kiwifruit research to create "digital twins" of pollination processes in kiwifruit orchards. These provide mathematical models of the biology of the plants and the behavior of pollinating bees.
The research suggests that fruiting success is more sensitive to variation in plant traits and the female-to-male flower ratio rather than bee density. The models provide a platform to test more questions and develop recommendations for growers.

$\rightarrow$ At $38 \%$ by value, kiwifruit is by far the highest value horticultural export crop of New Zealand's horticultural exports in 2020.
$\rightarrow$ In 2020 New Zealand exported 552,800 tonnes of kiwifruit valued at $\$ 2.53 \mathrm{~b}$ fob (2019: 545,800t/\$2.30b). The averages for the previous five years, 2014 to 2018, were 452,800t and \$1.59b fob.
$\rightarrow$ New Zealand-produced kiwifruit were exported to over 51 countries in 2020, with \$1.65b (2019: \$1.53b) to Asian countries, two importing more than \$500m: Japan $\$ 671 \mathrm{~m}$ (2019: $\$ 590 \mathrm{~m}$ ) and China $\$ 565 \mathrm{~m}(\$ 510 \mathrm{~m})$. In 2020, $65 \%$ by value of New Zealand kiwifruit exports were to Asian countries (2018: 66\%). Kiwifruit to the value of $\$ 641 \mathrm{~m}$ ( $\$ 566 \mathrm{~m}$ ) went to countries in Continental Europe.*
$\rightarrow$ A new red kiwifruit cultivar, the result of 10 years of research and development undertaken by partners Zespri and Plant \& Food Research, is in production. Expansion to commercialisation followed strong consumer support from limited releases in New Zealand and Singapore. By mid-2020 the cultivar was being marketed in New Zealand, Singapore and Japan.
$\rightarrow$ Zespri's established 'Zespri Global Supply' provides their brand with Northern Hemisphere produced fruit equivalent to approximately 10 percent of Zespri's total production and targeted at the three months when New Zealand-grown kiwifruit is unavailable to export markets. During 2019/20, Zespri Global Supply sales reached 19.1 million trays (2018/19:18.4 million trays). Zespri sources kiwifruit from around 750 producers located in Italy, France, Greece, Korea and Japan.

$\rightarrow \operatorname{In} 2020$ New Zealand exported 400,477t of apples in the year to Dec. 2020, a 53\% increase on a decade earlier (260,422t in 2010) Source: NZApples \& Pears Inc.
$\rightarrow$ The modern apple can be traced back to the Silk Road trading routes approx. 2,000 years ago. Today there are more than 7,500 varieties of apples grown worldwide with 24 or more apple varieties grown commercially in New Zealand.
$\rightarrow$ FAO Stat tracks apple production of 96 countries that in 2019 produced a total of 87.2 million tonnes (Mega tonnes/ Mt ) of which the largest producing country was China with 42.4 Mt ( $48 \%$ of global apple production). 11 other countries each producing more than 1.0 Mt totalled $14.9 \mathrm{Mt}(17 \%)$. Those producing more than 3.0Mt each were: USA (5.0Mt), Turkey (3.6Mt) and Poland (3.1Mt). In 2019 New Zealand production was recorded as $553,000 \mathrm{t}$ ( 0.55 Mt ).
$\rightarrow$ New Zealand's apple industry has the highest productivity in the world, averaging 65 metric tonnes per hectare per annum. In 2017 and 2018 'The World Apple Review' ranked New Zealand \#1 in International Competitiveness among 33 appleexporting countries, scoring across 23 criteria.

Apple export production by variety: 2005-2020 (tonnes x 000)

[^1]
## First apple released for high temperature regions

The first apple bred specifically for growing in high temperature areas has been released from the Hot Climate Programme (HCP). 'HOT84A1' is a mid-season, partial red-skinned sweet apple with a lightly crisp and very juicy texture. Commercial plantings have now begun in Spain and will roll out through a global network.
The HCP is a breeding collaboration between New Zealand's
Plant \& Food Research, Spain's Institute of Agrifood Research and
Technology (IRTA) and Catalonia fruit producers Fruit Futur. In 2019,
T\&G Global joined as the strategic commercialisation partner.

$\rightarrow$ Global exports of apples in 2019 were 9.8 Mt from 62 countries, 6 of which exported more than New Zealand's 391,000 tonnes ( 0.4 Mt ) in that year: China (1.0Mt), Poland (1.0Mt), Italy ( 0.9 Mt ), USA ( 0.8 Mt ), Chile ( 0.7 Mt ) and South Africa ( 0.5 Mt ).
$\rightarrow$ New Zealand exported 34,000 tonnes to China in 2020 with a value of $\$ 115 \mathrm{~m}$ (2019: 42,670t/\$126m fob).

$\rightarrow$ New Zealand's fresh and processed fruit exports in 2020 totalled $\$ 5.7$ billion (2019:\$5.3b), were over $\$ 1.0 \mathrm{~b} / 20 \%$ above the previous five-year average of $\$ 4.8 \mathrm{~b}$ (2015 to 2019). The dominant fruit export products were kiwifruit, grape wine, apples and avocados.
$\rightarrow 2020$ kiwifruit exports $\$ 2.53$ (2019: $\$ 2.30$ b) were $69 \%$ of the total fresh fruits export value; apple exports $\$ 876 \mathrm{~m}(\$ 829 \mathrm{~m})$ were a further $24 \%$. Other fresh fruit

## New Zealand blackcurrants are proven to improve sports performance

A meta-analysis conducted by scientists from the University of Auckland and Plant \& Food Research has concluded that consuming New Zealand blackcurrants improves sports performance compared to a placebo. In addition to improving blood flow, it is possible the unique balance of anthocyanins in New Zealand blackcurrants primes the body's adaptive defence systems, helping to mediate the benefits of exercise training on oxidative stress management, inflammation and immunity.

Vegetable exports 2005-2020 (\$ million, fob)

Source: Statistics New Zealand. Years ending 30 June.
$\rightarrow \quad \ln 2020$ New Zealand exported $\$ 724.5 \mathrm{~m}$ fob value of vegetables with a net weight of 569,800t (2019: $\$ 699.0 \mathrm{~m} / 518,650 \mathrm{t}$ ) across more than 20 significant types. The average export value for the five years prior to 2019 was $\$ 611.7 \mathrm{~m}$ fob.
$\rightarrow$ Four products were 64\% by value of all New Zealand vegetable exports in 2020:

- Onions: $\$ 147.6 \mathrm{~m}$, with $\$ 94 \mathrm{~m} / 64 \%$ exported to two markets: Continental Europe $\$ 61.8 \mathrm{~m}$ and Indonesia $\$ 32.2 \mathrm{~m}$.
- Potatoes: $\$ 126.5 \mathrm{~m}$; fresh $\$ 19.6 \mathrm{~m}$, frozen: $\$ 97.3 \mathrm{~m}$ (Australia $\$ 58.4 \mathrm{~m}$. Asian countries $\$ 58.4 \mathrm{~m}$ ), and other processes $\$ 9.6 \mathrm{~m}$
- Peas: $\$ 115.4 \mathrm{~m}$; frozen peas: $\$ 80.2 \mathrm{~m}$ (Australia $\$ 32.7 \mathrm{~m}$, China $\$ 29.5 \mathrm{~m}$ ); and dried peas $\$ 35.3 \mathrm{~m}$ exported to 44 countries.
- Squash: $\$ 79.2 \mathrm{~m}$, with $\$ 77.8 \mathrm{~m} / 98 \%$ exported to three markets: Japan $\$ 52.7 \mathrm{~m}$; Korea $\$ 17.7 \mathrm{~m}$ and China $\$ 7.4 \mathrm{~m}$.
$\rightarrow$ Other significant value export vegetables were:
- Sweetcorn: \$47.6m; frozen sweetcorn: \$23.9m (Australia \$9.6m, Japan \$8.3m); dried sweetcorn: $\$ 18.1 \mathrm{~m}$ and sweetcorn preparations (e.g. canned) $\$ 5.6 \mathrm{~m}$.
- Beans: $\$ 42.0 \mathrm{~m}$ : preparations $\$ 32.2 \mathrm{~m}$ (Australia $\$ 31.1 \mathrm{~m}$ ); frozen $\$ 8.7 \mathrm{~m}$.
- Single-vegetable juice (primarily of carrot): $\$ 32.9 \mathrm{~m}$ (Japan $\$ 27.2 \mathrm{~m}$ ).
- Capsicums: 24.7m (Japan \$20.4m)
- Beetroot, processed: \$24.1m (Australia \$23.6m).
$\rightarrow$ New Zealand imported 117,300 tonnes of vegetables in 2020 with a cif value of \$285m (2019: 121,900t/\$274m); preserved tomatoes \$35.8m cif (from Italy \$18.6m, the USA $\$ 9.5 \mathrm{~m}$ ); and frozen potatoes $\$ 34.9 \mathrm{~m}$ (from Australia $\$ 13.9 \mathrm{~m}$, Continental Europe $\$ 9.3 \mathrm{~m}$ and the USA $\$ 7.6 \mathrm{~m}$ ).

## Fresh food that is healthy for you and the environment

Sustainable Vegetable Systems (SVS) is a four-year project focused on improving crop nutrient management for the growing of potatoes, onions, brassicas, butternut squash, carrots, and leafy greens. The project has nine commercial field sites across the country and has $\$ 7.5$ million in backing from MPI and industry.
Some of the ways the project plans to assist growers to operate efficiently while reducing their impact on the environment include accurate managing of nutrient flows, robust tools to measure their environmental impact and the development of decision tools to support sustainable growing practices.

Destinations of New Zealand vegetable exports 2020

Source: Statistics New Zealand

New Zealand exports of organically certified produce (\$ millions)

Source: New Zealand Organic Market Report 2020. Years ending March.
Organic production
$\rightarrow$ Export values of organically certified fresh fruit and vegetables in 2020 were $\$ 143.9 \mathrm{~m}$ and $3.6 \%$ of New Zealand's total fresh fruits and vegetables exports.
$\rightarrow$ Strong growth in exports of organically certified wine in 2020 increased its export value to $\$ 65.2 \mathrm{~m}$ and $3.4 \%$ of New Zealand's total wine exports. The area under organic wine grape production was 2,283ha ( $5.7 \%$ of the total planted area for wine grapes). At vintage 2019, New Zealand had 111 certified organic grape growers and 73 certified organic wineries.
$\rightarrow 85,850$ hectares of New Zealand's land area was under organic certification in 2020. 18,890ha ( $22 \%$ ) was in fruit and vegetables and 2,285 ha ( $3 \%$ ) in viticulture. A further 6,000ha was under conversion to organics. Decreases in organically certified land since 2015 were primarily in pasture land for grazing.

## A vital contributor to horticulture

$\rightarrow$ Bees are crucial to New Zealand's primary sector, pollinating approximately onethird of our food sources.
$\rightarrow$ Honey production in 2020, at 27,000 tonnes, was up by $4,000 \mathrm{t}$ compared with 2019 and $115 \%$ more than a decade earlier (2010: 12,533t). The previous five-year average (2015 to 2019) was 19,500t. Average yield per hive was 31.1 kg (20152019: 26.0 kg ).
$\rightarrow$ In 2020 New Zealand's honey exports went to 62 countries, with a total value of $\$ 424.7 \mathrm{~m}$ fob (2019: $\$ 355 \mathrm{~m})$, $84 \%$ by weight in retail packs (2018: 76\%). 2010 export value was $\$ 97.6 \mathrm{~m}$ fob.
$\rightarrow$ As at June 2020 New Zealand's 9,585 registered beekeepers (2019: 9,282) had 869,056 hives (2019: 918,026 hives) and 130\% more than a decade earlier (2010: $376,540)$. Beekeeping enterprises increased by $3 \%$ from 9,282 in 2019 to 9,585 in 2020.

N.B. survey is of households only and excludes overseas visitors, people living in hotels and motels, etc., and excludes restaurants and takeout meals.

Investment in the horticultural industries (2020, \$ million)

|  | Crop area <br> (ha) | On-farm (\$ million) | Off-farm (\$ million) | Total (\$ million) |
| :---: | :---: | :---: | :---: | :---: |
| Apples, pears \& nashi | 10,750 | 2,045 |  |  |
| Wine grapes | 39,935 | 7,670 |  |  |
| Kiwifruit | 12,905 | 10,130 |  |  |
| Summerfruit | 2,350 | 270 |  |  |
| Avocados | 3,937 | 1,005 |  |  |
| Citrus | 1,660 | 210 |  |  |
| Berryfruit | 3,068 | 270 |  |  |
| Nuts | 958 | 60 |  |  |
| Olives | 2,130 | 190 |  |  |
| Hops | 920 | 170 |  |  |
| Other fruits | 587 | 50 |  |  |
| Total fruits | 79,200 | \$22,070 | \$29,800 | \$51,870 |
| Potatoes | 10,417 | 835 |  |  |
| Peas \& Beans | 4,890 | 320 |  |  |
| Onions | 5,296 | 425 |  |  |
| Squash | 6,530 | 815 |  |  |
| Sweetcorn | 3,871 | 370 |  |  |
| Broccoli, cabbages \& cauliflowers | 2,868 | 170 |  |  |
| Carrots | 1,900 | 115 |  |  |
| Asparagus | 520 | 30 |  |  |
| Lettuces | 1,582 | 95 |  |  |
| Other vegetables | 6,863 | 410 |  |  |
| Veg. seed growing | 11,063 | 665 |  |  |
| Total vegetables (outdoor) | 55,800 | \$4,250 | \$3,200 | \$7,450 |
| Floriculture - outdoor | 1,760 | 230 |  |  |
| Protected - greenhouse tomatoes | 85 | 385 |  |  |
| - indoor vegetable crops | 180 | 405 |  |  |
| - floriculture (undercover) | 105 | 235 |  |  |
| Total floriculture \& protected crops | 2,130 | \$1,250 | \$300 | \$1,550 |
| Total horticultural | 137,130 | \$27,570 | \$33,300 | \$60,870 |

The above table is an estimate of the investment that has been made in the productive area of New Zealand horticulture and related postharvest facilities
Crop area figures are predominantly industry estimates of planted areas per crop for the year to June 2020 (pgs 8 to 16 incl.) with author adjustments for informal production. The numbers differ from Statistics New Zealand Agricultural Production Census hectares as at June 2017 (pgs 26 \& 27). No adjustment has been made for non-productive farm/ orchard/vineyard areas, which are typically $15 \%$ of total area and up to $80 \%$ for crops such as floriculture under cover. Land values are based on independent land valuation advice and industry and authors' estimates across crop types that collectively account for more than $75 \%$ of fruit production and more than $50 \%$ of vegetable production. Off-farm investment amounts have been estimated from industry advice and guidance, including from integrated producers whose supply chains include both production and post-production.

## Trends:

$\rightarrow$ Highest value horticultural land 2020 was for Kiwifruit Gold varieties with ceiling of $\$ 1.2 \mathrm{~m} / \mathrm{ha}$ (Green varieties $\$ 660 \mathrm{k} / \mathrm{ha}$ ) in Bay of Plenty region and $\$ 955 \mathrm{k}$ in Northland (Green \$495k/ha).
$\rightarrow$ Marlborough had highest value wine grape land at \$340k/ha although most of Wairau Valley \$175k to \$250k/ha compared with Hawke's Bay \$85k to \$120k/ha.
$\rightarrow$ Apple orchard values influenced by variety, returns and yields can peak at $\$ 320 \mathrm{k} /$ ha but most in \$155k-\$220k range (Hawke's Bay largest apple crop region). Land value for growing older apple varieties often equates to bare land value $\$ 100 \mathrm{k}$ to \$160k/ha.
$\rightarrow$ All sectors have increasing concern around ability to harvest crops, impacting cash-flow and ability to supply contracted volumes. Additionally, some concerns for adequate water supply, for example avocado growers in Northland.

## THERE'S MORE TO FRUITION THAN YOU MIGHT REALISE

As growers and technical consultants working across the country, we know the industry inside out.

Our horticultural consultants deliver independent advice and services that improve our clients' business performances. What's more, we're passionate about training development to help our industry grow.

- Consultancy for kiwifruit, pipfruit, avocados, grapes, summerfruit and hops
- Industry analysis and research
- Irrigation and Pest \& Disease services
- Skills development

fruition.net.nz

The New Zealand Horticentre Trust was established in 2008 with the objective of providing 'A helping hand for horticulture'
The Trust encourages Horticulture and Viticulture sector groups to apply for grants to assist them in the promotion of education, training \& research in New Zealand.
The NZ Horticentre Trust has three principal sponsors, Horticentre, TasmanCrop and HortFertplus. These three principal sponsors have been providing quality products and services to commercial crop growers since the 1980's.
The NZ Horticentre Trust is proud to be supporting the Horticulture, Viticulture and Nursery sectors in NZ.

## New Zealand APPLES

## It takes more than fresh air \& sunshine to grow the world's best...

Join United Fresh, New Zealand's only pan-produce industry organisation with representation from the entire supply chain.
We work on behalf of members and the pan-produce industry to provide valuable relevant services including:

- Communications and Public Relations
- Health and Nutrient Claims
- Nutrition Information Panels
- Fruit \& Vegetables in Schools
- International Connections
- Research Projects and Pilots
- Members' Meetings and Workshops

Through our Technical Advisory Group:

- Biosecurity
- Food Safety
- Traceability, including the Sustainable Farming Fund traceability project
- Supply Chain Management
- Compliance, e.g. Weights \& Measures
- Climate Control
- Sustainability
- Submissions

## FRUITION

Ministry for Primary Industries
Manatū Ahu Matua

Food. Environment. Society.
Segment magazine explores the changing world of food production, the environment, and society's evolving relationship with food.

Each issue of Segment showcases how science is partnering with horticulture, arable seafood and food and beverage industries to create a smart green future.

## Unwanted!

BROWN MARMORATED STINK BUG (alias BMSB)
ORIGIN: Asia, but has invaded other countries including the USA and Europe.

APPEARANCE: About the size of a \$1 coin, shaped like a green vegetable bug with black and white markings.
IMPACTS: It could damage almost any New Zealand horticultural crop. In winter it will move into homes where it overwinters and is not easily treated with insecticides. It omits a nasty odour when squashed.

SPOTTED WING DROSOPHILA (alias SWD)
ORIGIN: Southeast Asia, but now a major pest in the USA and Europe. APPEARANCE: Resembles a vinegar fly - about 2-3.5 mm long with a yellow-brown body and red eyes. Males have a black spot near the tip of each wing.
IMPACTS: It lays its eggs in ripening fruit, posing a serious threat to summerfruit, particularly cherries

QUEENSLAND FRUIT FLY (alias Qfly)
ORIGIN: Queensland, but has spread to other parts of Eastern Australia.

APPEARANCE: Approximately 6-8 mm long, reddish-brown with yellow markings.
IMPACTS: It will attack around 80\% of New Zealand horticultural crops, laying its eggs inside fruit. It was eradicated from Auckland in 2015. MPI are undertaking a response in 2019 after separate male Qfly detections; no breeding population has been found.

SPOTTED LANTERNFLY
ORIGIN: Asia, but has invaded the USA.

APPEARANCE: About 2.5 cm long, with greyish wings with black spots and a body that looks like it's glowing red.
IMPACTS: It feeds on woody and non-woody plants. It sucks sap, which leaks out and promotes mould growth. It can lay its eggs on smooth surfaces, like shipping containers, and covers its eggs in wax so they are hard to see.
